

Describe your images

Fully describe and tag each image with text, numbers, dates and check boxes. The ImageLinker database is easily tailored for each individual project.

Filtering Options

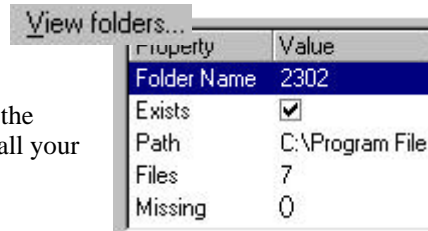

Quickly find the right image

Browse image lists sorted by user tags and descriptors. Sub-set the listing with filters. Optionally click on a map to build a list of relevant images. Review the thumbnails or double click to see an enlargement.

Manage your image files

No more lost images. Simply drag files onto the database screen to build a central register of all your digital images.

GBM ImageLinker is a member of the GBM Software and GeoBasemap product ranges. Call Exa-Min or your local GBM Software reseller.

Yes, I manage digital images.
Please send me a copy of GBM ImageLinker for an obligation free 30 day evaluation.
